SPECIALIST RECRUITER

Increases onboarding efficiency through reduced time & cost

Mader Group, a specialist recruiter, was able to increase efficiency by reducing both the time and costs associated with the pre-employment assessments of the onboarding process.

Mader Group

Mader Group receive a high volume of job applications daily.

As a contractor, the nature of their work requires recruiters to onboard personnel efficiently and quickly for rapid deployment to site to meet highly reactive customer demands.

Onboarding of personnel can be particularly challenging when time plays a critical role in the process.

Mader required a solution to process applications in a timely manner whilst still ensuring thorough checks were in place and high quality candidates selected.

PremoSystems Solution

Commencing in 2017, Mader saw an immediate reduction in onboarding time and costs with the first version of PREMFA™.

Since then, PREMFA™ has evolved into a mobile friendly, online data and photo collection tool, automated assessment engine and management portal.

PREMFA™ enables Mader to process candidates in an efficient and thorough manner, that reduces stress on the recruitment personnel and is more user friendly for candidates, whilst ensuring appropriate medical and function assessments are completed in line with mining regulations and requirements.
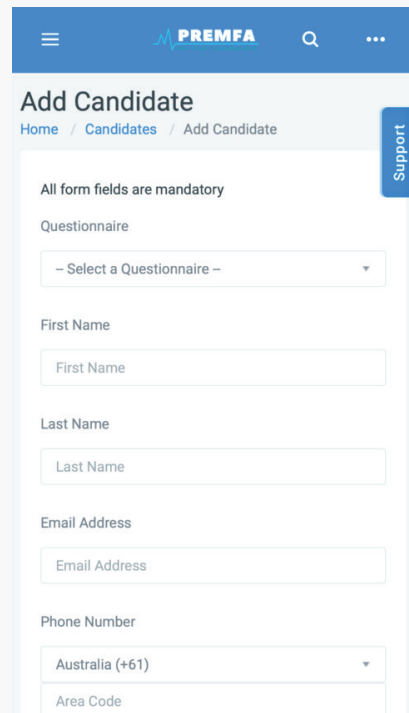

Mader Benefits

The selected divisions using PREMFA™ reported:

- a reduction in total time to process candidates through the recruitment process from start to finish.

- cost savings in the areas that PREMFA™ was used.

- a reduction in workload and stress.

> *"Use of PREMFA™ helps us process candidates quickly and efficiently, simplifying some of our recruitment, pre-employment assessments and on boarding processes"*

Why use PREMFA™

- PREMFA™ streamlines onboarding assessments for both your team and candidates.
- Fast, easy and paper free invitations and automated reminders save Recruitment and Onboarding teams effort and frustration.
- Mobile friendly collection tool makes it quick and easy for new starters and mobile candidates to complete their assessments.
- Automated assessment engine analyses data and images.
- Easily scales so you can handle bulk recruitment.
- Reduced costs, faster outcomes, increased efficiency and reduced workload.

PREMFA™ Significantly Lowers Costs, Reduces Timeframes from Days to Minutes & Increases Onboarding Efficiency
